February 7, 2025

## **Selected for CDP's 2024 "A List," the Highest Rank, for the First Time in the Climate Change Field**

EXEO Group, Inc. (head office: Shibuya-ku, Tokyo; Tetsuya Funabashi, President) has been selected by CDP(head office: London, UK), an international NGO, for the first time as an A-List company with the highest rating in the climate change field 2024, in recognition of its innovative initiatives in the area of climate change and environmental transparency.

CDP is a non-profit organization that runs the global disclosure system for companies and local governments around the world. CDP evaluates and assesses corporations with a detailed and independent methodology and scores their impacts using 8 scores (A to D-), based on verification of best practices regarding information on environmental activities, such as comprehensiveness of their information disclosure, awareness and management of environmental risks, and ambitious and meaningful target setting.

The Exeo Group defined the practice of ESG management as one of the challenges in its 2030 Vision, and set environmental, social, and governance KPIs, as well as specific targets in Medium-Term Management Plan (2021-2025), which it is working systematically and continuously to achieve. The Group will engage in eco-friendly business practices, which include reducing greenhouse gas emissions, while also working actively to contribute toward solutions for climate-related social issues through businesses such as renewable energy.
